Equine RVS Exam Study Guide - 2025

This guide will help you prepare for your ABVP Recognized Veterinary Specialty (RVS) examination this November.

The 350 item RVS Exam is given in two parts on the same day. The exams are mostly to exclusively multiple-choice. There is the possibility of fill in the blank, short answer, essay, or matching for some exam items. The AVMA best practice is that the examination items align with a Job Task Analysis (JTA) of current RVS Diplomates. The 2018 JTA identified tasks, diseases, etc. that Diplomates either saw frequently or expected a Specialist to have immediate knowledge of the subject.

Additionally, it has been decided that some exam items can come from current journals and a small percentage can be at your Exam Committee's discretion. Please note that items drawn from current journals (with a 5 year look back period) are 1) from a journal on the RVS Reading List, 2) the question is drawn from the abstract only, and 3) the journal abstract must be inexpensively obtained. The exception to this is Veterinary Clinics of North America (if applicable), where the exam taker is responsible for the whole article.

Exam Blueprint

For topics that are systems (such as Cardiovascular, etc.), questions can include anatomy, physiology, pathophysiology, diseases (Including neoplasia), etiologies, diagnosis, and therapy.

Specific conditions

Certain conditions were identified as important to Diplomates in your RVS. This list is meant to help guide your study and not meant to be an all-inclusive list. Conditions not on this list may be present on the exam.

acute colitis/diarrhea analgesia anesthesia and recovery arthritis (septic and nonseptic) athletic training injuries bacterial pneumonia bacterial sepsis colic conjunctivitis corneal ulcer cryptorchidism degenerative joint disease dehydration dental disorders desmitis of suspensory ligament developmental orthopedic disease endoparasites esophageal obstruction exuberant granulation tissue gastric ulcers hyperadrenocorticism inflammatory airway disease influenza intestinal obstruction keratoconjunctivitis lameness laminitis
